

Dual Dektite Silicone Kit Red (25-35mm)

11MM-DSK200RES

The DSK200RES kit comes with two red silicone based dektites which contains a reinforced aluminium frame around the base, designed to mould to multiple roof profiles. This kit also comes with sixteen 10G screws and a heavy duty flashing adhesive, providing all the equipment to easily complete any project. The dektites in this kit are rated to withstand extreme temperatures from -50°C to 200°C. Allowing 25-35mm penetration.
