

Top Hat Roof Kit (110DN) 11MM-DTHRKIT110

The DTHRKIT110 top hat roof kit is precision engineered using a PVC pipe and cap to create a right angle bend, suitable for harsh environments. Internal piping provides a 103mm clearance allowing multiple cables to pass through the dektite with ease, creating a water tight seal, providing a UV rated solution.

Features and Benefits

- » Suitable for Harsh Environments - Manufactured from corrosion resistant materials.
- » Multi pipe penetration kit with all required components to get the job completed.
- » Kit provides clearance size of 103mm.
- » Kit includes instruction sheet, black cable tie (150mm length), 12x 10G SDS screws (16mm length), 2x grey Dektite adhesive (50ml), PVC cap (DN65), slotted pipe (DN50) and square base flashing.
