

60/90 VAC 15A Power Supply For Cable Networks 14MM-PVS630

The 14MM-PVS630 is a CATV 15A 60/90 VAC power supply for use in CATV networks for powering downstream amplifiers. The PVS630 comes with a thick rugged aluminium enclosure and is equipped with status and fault indicators. Nominal input voltage 120/230 VAC switchable with input frequency 50Hz.

Features and Benefits

- » Output Voltage 60/90 V Switchable
- » Maximum Output Current 15amp
- » Ferroresonant Transformer
- » Voltage Protection Short Circuit and Alarm
- » Flange Fitting 5/8" Female
- » Mounting Wall or Pole
