

70M 4K High Speed HDMI® Extender Over Cat6

18Gbps HDCP 2.2 with ARC

34MM-4K70-ARC

For the Best

4K HDR HDMI® transmitter and receiver over CAT6 (up to 70m) supporting 18Gbps HDCP 2.2 and ARC. The 4K70-ARC can be used to extend your 4K signal to a second TV with remote IR control without loss of video or audio quality. It features an HDMI® loop-out for local TV connection and PoC (Power Over Cable), needing only one power supply at either end. Pay TV compliant IR receiver, and transmitter included. ARC allows the audio content from the TV to be delivered back to the HDMI® source.

4K HDR

18Gbps

Features and Benefits

- » Extend 4K HDR Ultra High definition picture and sound from an HDMI® source up to 70m using a single CAT6 cable
- » HDMI® loop out port allows for cascading additional extenders or local TV connection
- » ARC (Audio Return Channel) function, allowing TV digital audio across HDMI source. CEC code transfer is also supported, allowing the remote control to function.
- » Remote IR control from the extender to a source using supplied IR accessories (compatible with pay TV IR remotes)
- » PoC (Power Over Cable) function. Only one power supply at the source end.
- » 4K High Speed HDMI®, HDCP 2.2/HDCP 1.4 and DVI 1.0 compliant
