

Chameleon software options are one off licence files that enable specific functionalities, Multiplexing, DVB Modulation, IP Streaming, Encryption or Decryption of services, plus many more. The software options can be bought at the same time as the hardware, or as a separate order. You can add software options to an existing Chameleon at any time, when you want more functionality or simply to upgrade to the latest available features.

### Features and Benefits

- » Individual unlocking of required functionality. You only pay for what you use
- » Hospitality applications for content protection using DRM including both descrambling and scrambling of services
- » Firmware version upgrades for 12 months from activation
- » Quick and easy expansion by adding additional units or software options, extended SLA available
- » Absolute flexibility for signal processing

Product Code	License For
14MM-GNC	One DVB-C Tuner
14MM-GNDC	Two DVB-C Tuners
14MM-GNCI	One CI Slot
14MM-GNDCI	Two CI Slots
14MM-GNCMOD	One QAM Output
14MM-GNDCMOD	Two QAM Outputs
14MM-GNDASI	Dual ASI In/Out BNC 1 & 2
14MM-GNDOL	Dolby Audio Decoding
14MM-GNT	One DVB-T Tuner
14MM-GNDT	Two DVB-T Tuners
14MM-GNTMOD	One COFDM Output
14MM-GNDTMOD	Two COFDM Outputs
14MM-GNVMOD	One VSB Output
14MM-GNDVMOD	Two VSB Outputs
14MM-GNHSDI	HD SDI Decoder On BNC1
14MM-GNMUX	Multiplexer
14MM-GNOCTFM	8 FM Radio Outputs
14MM-GNS2	One DVB-S/S2 Tuner
14MM-GNDS2	Two DVB-S/S2 Tuners
14MM-GNSCR	Quad Simulcrypt Scrambler
14MM-GNSSDI	SD SDI Decoder To BNC1
14MM-GNSTR	IP Streaming
14MM-GNSTREC	IP Streaming With FEC
14MM-GNSYMUX	Umbrella Software For Interconnected Multiplexers
14MM-GNSYSMG	System Management
