

Laser Transmitter L-Band Single Wavelength

Features and Benefits

- » 950-2500MHz RF operating bandwidth
- » High linearity, suitable for CATV & satellite-IF application
- » Optical transmitter satellite-IF adopts high-linearity IF drive amplifying circuit with AGC function
- » SNMP support remote management and control
- » Precise laser chip using Broadband LiNbO3 external modulation, narrow-linewidth CW DFB laser
- » SCAPC output connectors are used for television optimisation

Product Code	Wavelength
20MM-LT1X2050-1550.92	1550nm
20MM-LT1X2050-1552.52	1552nm
20MM-LT1X2050-1555.75	1555nm
20MM-LT1X2050-1557.36	1557nm
