

For the Best

AUSTRALIAN PACKAGING COVENANT POLICY

Matchmaster is committed to minimizing the environmental impact that Matchmaster's products places on the environment through all aspects of the supply chain, and the impact that business practices place on the environment locally.

This commitment is demonstrated by Matchmaster:

- ✓ reviewing existing packaging types for all products by 2016,
- ✓ Implementing a review of new product packaging marketed before it is distributed
- ✓ Using materials, water and energy efficiently
- ✓ Maximize the use of electronic media in favour of hard copy
- ✓ maintaining a process of review to ensure the most appropriate packaging and processes are used at all times to minimise the amount of waste and litter generated.
